

Indoor

T125-5X

Standard Features

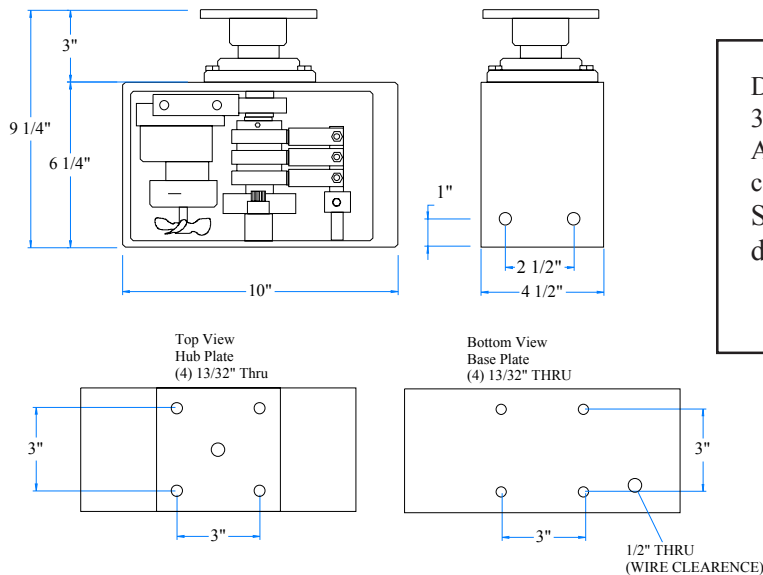

- ◆ Welded Steel Frame
- ◆ Belt Drive
- ◆ Solid Construction
- ◆ Machined Surfaces
- ◆ Strong, Reliable Bearings
- ◆ Machined-Pressed Fit Collector
- ◆ High Torque Motor

T125-5X

The T125-5X is the largest of our Compact Series rotators. This rotator has a maximum thrust load of 600 Lbs. and has a bending moment of 900 Lbs. This rotator will support a heavy display in a very compact space. It can support heavy eccentric or overhung loads as in pinwheel or "Wheel of Fortune" type mounting or configuration without having to add an additional support bearing.

Optional Features:

- ◆ Rotation Speeds from 1/2 to 10 RPM (2 RPM Standard Speed)
- ◆ Snap-ring for hanging applications
- ◆ 110V or 220V, 50 or 60 Cycle motor
- ◆ 0 to 8 collector ring/brush assemblies available in 20A or 30A

Dimensions shown are for rotator with (3) 30A collector rings.
Add 3/4" to overall height for each additional collector ring.
Specify model T125-5X **SR** for hanging displays (SR signifies Snap Ring).
